IKON PREMIUM BLACK

The high-end trampoline for discerning tastes.

The frame and legs are made of powder-coated stainless steel, and the large jumping mat is made of robust, water- and UV-resistant synthetic fibers. Six stable legs put the trampoline on solid feet. The mat is attached with 36 elastic ropes, which allow for training sessions that are especially gentle on the joints and an optimal bounce.

You have the choice between four different rope thicknesses to adjust jumping levels according to weight, intensity and training goals. The PREMIUM BLACK is black, powder-coated steel, and fits into any environment with its unobtrusive elegance. A balancing handlebar is available as an additional trampoline feature.
